Re: Processing Fee calculations for Brownstone line

Greetings,

Pike's Bay Sanitary District agrees with the City of Bayfield to change the methodology of recording flows for the Brownstone line from monthly to bi-monthly as provided in the Brownstone Line Agreement. The total flows for the two months would be subtracted from the City flow calculation and added to the PBSB flow for calculating the bi-monthly processing fee.

If PBSB finds this modification to the agreement to be unacceptable they retain the right to request either a mutually agreeable change or a return to the procedure of the original agreement.

Please indicate your agreement to this modification and return an original to the above address for our files.

Regards,

Rex Dollinger, President
Pike's Bay Sanitary District Board

Chairman, City of Bayfield Public Works Commission
